

PRODUCT DATA SHEET

950 Dewatering Agent

DESCRIPTION

950 is an environmentally friendly dewatering agent for various slurries (CCR). This granular powder dewateres the slurries making them easily portable by mechanical means.

BASIC USES

Used in the dewatering of slurries **950** provides rapid and safe removal to storage, disposal, or recycling sites.

MAJOR ADVANTAGES of 950 Dewatering Agent

- Solidification mitigates negative effect of coal ash in ground water
- Non-toxic
- Environmentally friendly
- Reduces or eliminates the need for cement or LKD required to attempt to stabilize coal ash
- Requires a minute amount
- Acts rapidly to solidify coal ash slurry
- Highly Compactable
- Reduces Carbon Footprint
- Dewateres most effluent materials including mine tailings and other water borne slurries

METHOD OF USE

Apply **950** using mechanical spreaders per the below volumetric application quantities.

For calculating **950** required for 1 acre/ft 4350 lb (1973 kg) or about 2 MT (approx. 2 bags) are required. Per square yard (1 ft depth): 0.9 lb. (0.41 kg)

Available Packaging: Super Sacks

Storage: Keep under cover out of sun and rain

Temperature range of use: This product has no limit to the temperature range however it may be limited by the material it treats.

SAFETY

Please refer to the SDS at www.crccoatings.com. Use the same precautions as when working with conventional cement for coal ash removal. Although the material is non-toxic, it is good practice to protect exposed skin areas and wear a face mask to prevent inhalation of the aggregate particles.
